

Rain Barrel Workshop
Saturday, March 24, 2018
10:00 am to 12:00 pm
Zion United Church of Christ
8701 Cottington Road, Nottingham, MD 21236

Save water, save money, and save our creeks all at the same time!

Rain barrels help reduce stormwater runoff that carry pollutants to streams, creeks, and ultimately the Chesapeake Bay. This FREE workshop is meant for individuals interested in conserving water and protecting our local waterways.

- Build your own rain barrel! Choose from white, blue, or Kelly green.
- The water you save can be used for garden and lawn watering or washing your car!

Anyone can attend this educational workshop to learn about the benefits of a rain barrel. There is, however, a cost for the rain barrels (assembly kits included)

- Residents of *Clear Creeks Project* watersheds: \$30/barrel
 - Save 50% with our cost/share program and receive installation assistance free of labor charges
 - Visit gunpowdervalleyconservancy.org/clearcreeks to see if you are eligible
- Gunpowder Valley Conservancy members: \$50/barrel
- Non-members: \$60/barrel

REGISTER ONLINE at gunpowdervalleyconservancy.org/calendar. Space limited to 20 participants. Questions? Contact Peggy Perry, Gunpowder Valley Conservancy's *Clear Creeks Project* manager, at (410) 692-0468 or pperry@gunpowdervc.org

Rain Barrels are a way to implement Baltimore County's Small Watershed Action Plan (SWAP). Its goal is to reduce nutrient, sediment and pollution run-off that enter our local waters and ultimately the Chesapeake Bay. Barrels donated by McCormick and Company, Inc. Funding for this project made possible by:
